

## TITAN SGS™ STAPLER

The TITAN SGS stapler offers you an elegant alternative for performing sleeve gastrectomy. The device is designed to help you achieve more consistent and symmetrical sleeve pouch anatomy, setting your patients up for the best possible outcomes.

### Staple height indicators

identify the closed staple height (1.2mm to 2.2mm)

### Power pack release tabs

allow the motor pack to be removed

**23cm device jaw** is the industry's longest continuous 23cm staple line

**23cm staple cartridge** allows for longitudinal graduated stapling

### Handle trigger button

fires the device and opens and closes the jaws of the stapler

### Firing safety button

activates the firing system

**Titan SGS handle** is an ergonomically designed pistol handle grip

## TITAN STANDARD POWER UNIT

The Titan Standard Power Unit for use with the Titan SGS stapler uses visual and audible status indicators to provide ongoing information to the user and surgical team during the case. Intelligent tissue-sensing technology and enhanced stapling safety features constantly monitor tissue loads and prevent unsafe conditions enabling the surgeon to achieve more consistent results in gastric tissue.

### Device status indicator

### Clamp mode indicator

### Firing mode indicator

### Volume buttons

### Device connector receptacle

## A COMPLETE SOLUTION

Designed for use with the Titan SGS, the stapler utilizes the Standard Bougie™ 38 FR and the bladeless technology of the Standard Trocar™.

The Standard Bougie 38 FR and Standard Trocar are to be used with the Titan SGS.

# TITAN SGS™ EXCLUSIVELY FOR BARIATRIC SURGEONS

## ALIGN

The entire stomach tissue is placed into the Titan SGS allowing visualization of the full staple cut line in a single plane.

## DIVIDE

Titan SGS fires a single cartridge, completing the stapling in approximately 55 seconds.

## ACHIEVE

The ideal tubular surgical sleeve anatomy is a consistent shape that is free of kinks, twists, or spirals.
