

Prenatal testing reimagined

World's first capillary-based cfDNA screening tests, crafted by the same visionary team who launched the first commercially available non-invasive prenatal screening.

JunoDx was founded by the innovators behind the industry's first commercially available NIPS. Our team consists of clinicians, researchers, scientists, and advocates who are committed to democratizing the next generation of cfDNA-based NIPS. We believe that every expectant parent and family should have equitable access to high-quality prenatal information, and we have developed Hazel[™] to fulfill this need.

Hazel[™] clinically validated with >99% sensitivity and >99.9% specificity²

	Sensitivity (95% CI)	Specificity (95% CI)
Trisomy 21	>99% (95% - 100%)	>99.9% (99% - 100%)
Trisomy 18	>99% (94% - 100%)	>99.9% (99% - 100%)
Trisomy 13	>99% (79% - 100%)	>99.9% (99% - 100%)
HAZEL[™] PLUS Sex chromosome aneuploidy	>95% (95.7%-99.9%)	>99% (99%-100%)

MEET OUR TEAM

“

Prenatal genetic screening (serum screening with or without nuchal translucency [NT] ultrasound or cell-free DNA screening) and diagnostic testing (chorionic villus sampling [CVS] or amniocentesis) options should be discussed and offered to **all pregnant patients regardless of maternal age or risk of chromosomal abnormality.**

— ACOG, Practice Guidance¹

Why Choose Hazel™

Bridge the gap to equitable prenatal care

Meet patients wherever they may be. Hazel™ addresses the needs of all patients, regardless of circumstance or geographic location. Combining clinical quality and convenience, you can ensure patients are best equipped with the information they need with the support of the JunoDx team.

Reclaim your time and revolutionize your practice

Your patients, your schedule, your way. With phlebotomy-free testing, patients have the flexibility to collect their samples remotely or in-office with provider assistance. Additionally, using a secure online provider portal, you can conveniently place test orders, monitor patient order history, and view the status of results.

Amplify patient outcomes with personalized support

We're here as a trusted partner in your patient's pregnancy journey. Patients have direct access to an expert-curated library of online resources, Customer Care support, and board-certified Genetic Counselors. The JunoDx team will be available to assist with patient billing, clinical, shipping, and technical inquiries, and offer further personalized patient support via a Sample Collection Video Call.

Why Patients Prefer JunoDx

Peace of Mind

Providing accessible prenatal information and insight to inform pregnancy management and birth preparations.

At-Home Convenience

Phlebotomy-free testing allows providers to meet patients at point of need, offering results from the privacy and comfort of home through a Sample Collection Video Call.

Individualized Care

Patients are empowered to make informed decisions with the personalized support of JunoDx Genetic Counselors, customer services, and prenatal resources.

Accessible Screening For All

Hazel™ was developed as a high-quality, low-cost NIPS solution to ensure all parents and families have access to important prenatal information.

Insurance Billing

Working with all health plans to limit financial impacts on patients, by providing a lower cost to plans and patients than other tests.

Self-Pay Options

Offer patients the flexibility of paying out of pocket.

“ I was also advised by my doctor to take a NIPS test because of my age and was looking for a more affordable option than the ones that I was offered by my doctor and since I had such a wonderful experience with Juno for our gender test we trusted them with our NIPS. After our NIPS results came back my husband and I were walked through the results with a genetic counselor and felt so grateful that someone could explain the results to us in a way that we could understand.

— Andrey P., JunoDx Patient
