Dear Prix Galien Startup Advisory Board,

I am writing to express my enthusiastic support for HealthRhythms, an exceptional digital health startup nominated for the Prix Galien as the outstanding Digital Health startup of the year. As a Professor of Psychiatry in Chronobiology, I have followed the development of HealthRhythms since their founding and am deeply impressed by their unique blend of clinical science and transformational health products.

What sets HealthRhythms apart is their dedication to bridging the gap between scientific advancements and practical application. They have achieved what is often considered an exquisitely difficult task in the field of digital health: combining scientific rigor with user-friendly digital solutions and have created a seamless and accessible platform that empowers healthcare professionals to make informed decisions based on objective data. This ground-breaking approach has the potential to transform the field of behavioral health and improve the lives of countless individuals.

HealthRhythms' commitment to evidence-based practice and their deep understanding of clinical science make them a standout digital health startup. In light of their deep roots in clinical science and their remarkable translation of science into a transformational health product, I wholeheartedly endorse HealthRhythms for the Prix Galien.

Sincerely,

Colleen A. McClung, Ph.D.
Professor of Psychiatry and Clinical and Translational Science
Director of the Center for Adolescent Reward, Rhythms and Sleep
