

Prix Galien Start Up Advisory Board,

I am writing to express my wholehearted support for HealthRhythms as an exceptional digital health startup worthy of the Prix Galien outstanding Digital Health startup of the year. As a medical doctor and an experienced investor in health technology at GSR Ventures, I have had the opportunity to deeply evaluate over two hundred mental and behavioral health startups applying best-in-class technology to deliver more efficient, effective, and scalable mental healthcare. Out of all of these remarkable opportunities, I recognize the truly unique potential of HealthRhythms to transform, not only psychiatric care but any area of health where behavioral health plays a role.

HealthRhythms stands as a one-of-a-kind digital health startup with the power to revolutionize healthcare. Their objective assessment of behavioral health has the potential to reshape diagnostic practices, optimal treatment selection, and treatment monitoring. I closely follow HealthRhythms' progress and have been impressed by their integration of cutting-edge technology and unwavering dedication to improving patient outcomes and clinical workflows. Their ability to scale their solution across vast patient populations in a highly cost-efficient manner also sets them apart from many other solutions in the field today. They have also backed up all of their claims by publishing their data and pursuing rigorous, clinical studies to reinforce the robust scientific and clinical foundation behind their technology.

HealthRhythms' commitment to scientifically-validated, ground-breaking technology, and potential to positively impact healthcare make them deserving recipients of this prestigious award. I wholeheartedly endorse HealthRhythms for the Prix Galien.

Sincerely,

Sunny Kumar, MD, MBA
