

**Category**

Best Startup

**Product/Solution Name**

Intelligent Threads

**Date of Approval**

N/A

**Indications**

muscular tension (tight muscles)

muscular discomfort/pain

poor posture caused by structural body issues

**Therapeutic Categories**

Skeletal Muscle Relaxants (but we are not a drug or medicine)

**Background information and need for solution/product**

Brian Burzynski, D.PSc., SRM

Intelligent Threads: President and Chief Science Officer

Synergy Release Method (SRM): Founder and Chief Therapist

Brian Burzynski, D.PSc., SRM has been practicing SRM® (Synergy Release Method®) therapeutic services since 2000, known as the best kept secret in body structure and body functionality. He has taken his education in Quantum Engineering and Mechanics, combined with 20 years of hands-on body alignment anatomy and physiology, to make the most sophisticated, technologically advanced way to correct body structure issues within minutes - Tension Release Technology™.

His clinic's motto is, "We want to see you once, then you have the technology to correct yourself." Most patients receive 80%+ improvements within one session, without a need to return.

Out of SRM birthed Intelligent Threads, the first ever Tension Release Technology™ textile which communicates to your muscular and skeletal system allowing your body structure to realign within seconds of contact to the material. Now used on over 10,000+ individuals since 2016, TRT™ has been proven to improve overall body structure by over 60% within the first 2mins of wear, decrease pain, improve sleep, regulate blood flow, and improve recovery.

Brian has worked on many great athletes and celebrities, such as Fred Couples (PGA), Andy Roddick (Tennis), Andy Reid (NFL KC Chief Head Coach), Terrell Owens (NFL), Houston Street (MLB), Yao Ming

(NBA), Justin Houston (NFL), Jim Morris (MLB), Zachary Levi (Actor), Lee Ann Rimes (Country Music Star), David Sinclair (Harvard Professor), and Dave Asprey (Godfather of Bio Hacking).

His body mechanics and technology have no comparison to anything currently available and are taking human body technology 100+ years into the future.

### **History of the development of the solution/product**

Tension Release Technology™ (TRT) is our proprietary new form of stabilized potential energy which interacts and communicates with the anatomy and physiology of the body specifically the muscular system. TRT is our proprietary technology, and we are the only company who has this scientific knowledge and product line available. Our finished products require no power source or recharging. Through our highly specialized trade secret process our technology can bond to any textile or gel/cream on the molecular level achieving long term viability to help support body function in muscular tension release and help improve overall body structure alignment.

The discovery process for this new type of energy focused on the quantum level of engagement with specific energy that interacted on a molecular level that produced the TRT energy field. This energy can now be placed into any type of textile through our proprietary scientific process.

Once infused into the textile (or gel/cream) it can be utilized as a timed energy release or infinite energy release with no significant decline in power.

### **Why this solution/product is innovative, the broad implications for future research, and/or how it will improve the human condition**

Once the textile is introduced to a human or animal, the TRT interaction occurs within seconds of entering the body's energy field. Our technology aids the body in immediately releasing and relaxing tight muscles allowing for improved body structure realignment. In our testing since 2016, on over 10,000+ people, the average initial interaction was a 70% improvement of the body's skeletal structure which in turn lead to a decrease in muscular discomfort that was due to previous body structural issues.

It is important to realize that when the body structure is out of alignment the muscles are not being utilized properly. Once the body structure is improved it takes time for the muscles to relearn their proper functions. The body's muscles can take roughly three to six months to completely heal and utilize their new anatomically correct state.

There are multiple stretches and movements that can aid the body in this process. Please visit our Movements & Stretches page for more information. ([IntelligentThreads.com/movements-and-stretches](https://IntelligentThreads.com/movements-and-stretches))
