

Revolutionizing Rural Healthcare: A Unified Operating System

Dr. Zafar Mirza - Ex. Federal Minister Health, WHO and Chair of Board, Dr. Emun Abdu MD, Advisor, Zahid Ali - Founder | TECHMEDO Inc.

Abstract

TECHMEDO has developed an innovative Healthcare Operating System that revolutionizes primary care delivery in underserved rural areas globally. By leveraging clinical algorithms, AI-powered decision support, and care plans, the platform improves efficiency, enhances patient care, and reduces physician burnout. In 8 months, TECHMEDO has served over 2 million patients, primarily women and children, in underprivileged regions. The solution streamlines workflows, enables informed clinical decisions, and facilitates preventative care. With a 300% reduction in patient clinic time and 30% decrease in physician burnout, TECHMEDO is making quality healthcare more accessible and affordable worldwide through its cutting-edge technology platform.

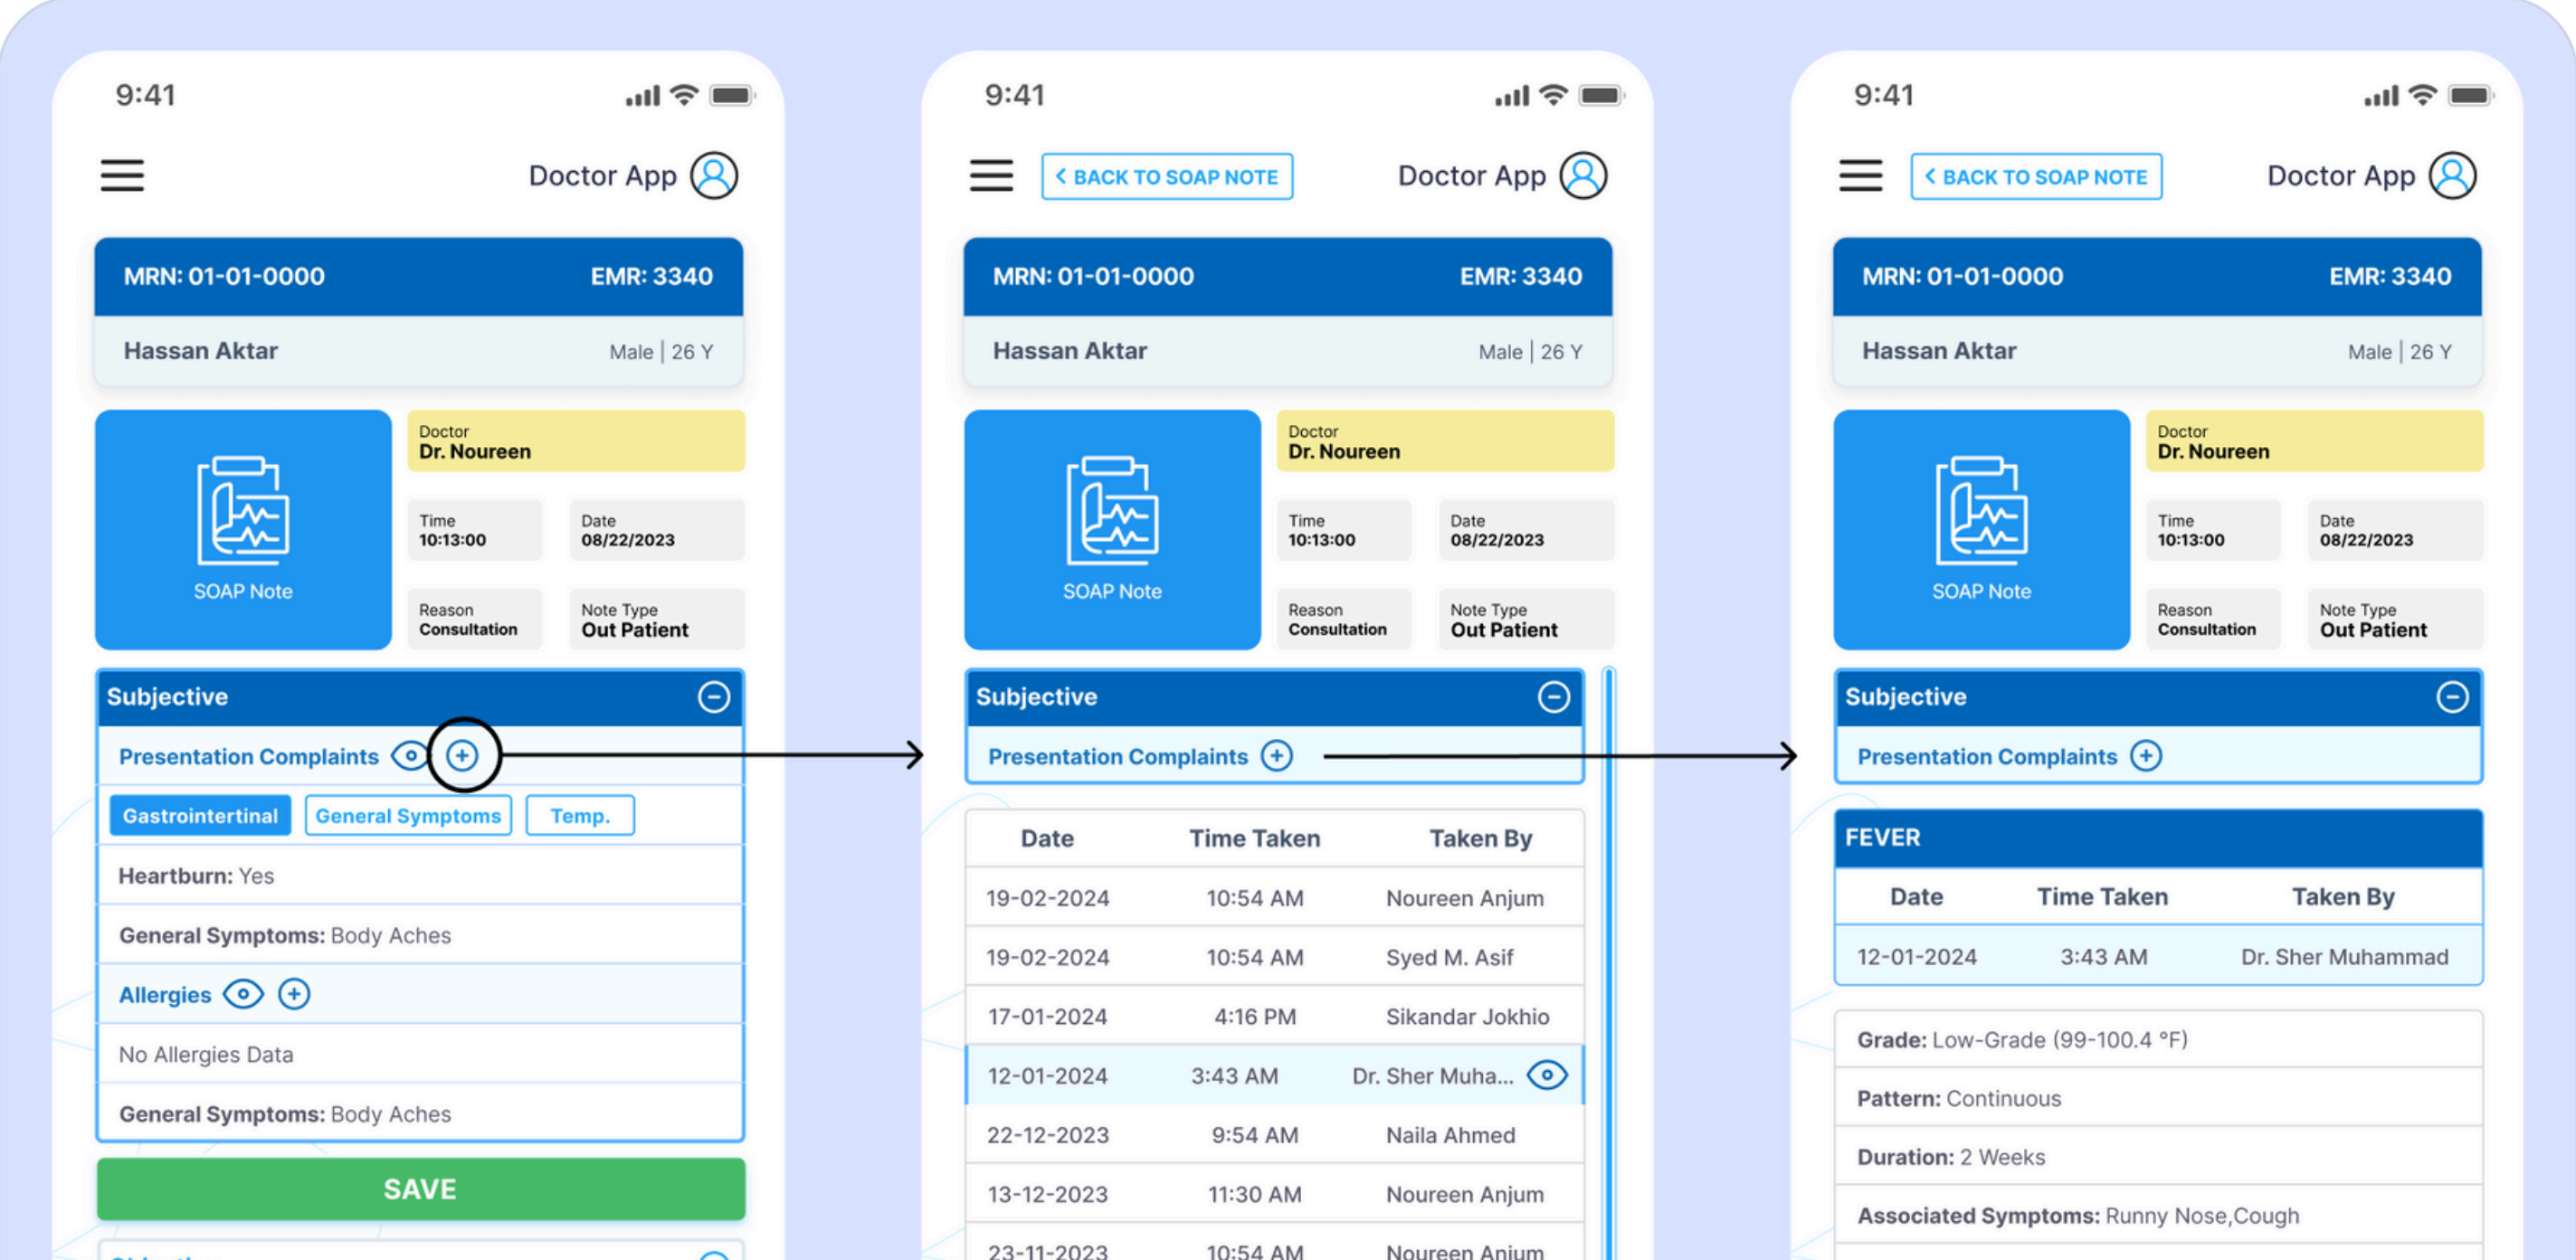

Problems & Addresable Market Size

- **Limited access to quality healthcare services** in rural and underserved areas (61.3% of EU villagers can reach a main healthcare service within 15 minutes.)
- **Traditional brick-and-mortar infrastructure** insufficient to bridge the gap - Over 50% of the world’s population lacks essential health services coverage.
- **High costs of healthcare** limiting access for many (41% of EU reduces essential spending to afford healthcare
- **Poverty Impact:** Around 1.3 billion individuals are pushed into poverty by out-of-pocket health payments, including 300 million already in extreme poverty.
- **Health Coverage:** More than half of the global population (4.5 billion people), were not fully covered by essential health services (2021-WHO).

TECHMEDO targets a vast addressable market, with a focus on expanding its reach in Europe, the Middle East, and other regions through strategic partnerships, in addition to its current operations in the USA and Pakistan.

TECHMEDO HOS - An Introduction

TECHMEDO Healthcare Operating System is a revolutionary platform that transforms primary care delivery in underserved rural areas worldwide. Leveraging clinical algorithms, AI-powered decision support, and care plans, TECHMEDO improves healthcare efficiency and quality. The system streamlines workflows, enables informed clinical decisions, and facilitates preventative care, reducing patient clinic time by 300% and physician burnout by 30%. In just 8 months, TECHMEDO has served over 200,000 patients, primarily women and children, in underprivileged regions. By making high-quality healthcare more accessible and affordable through its cutting-edge technology, TECHMEDO is poised to drive significant improvements in health outcomes on a global scale.

Anticipated Impact

- **Improved efficiency** by streamlining workflows and reducing patient time in the clinic by 300%
- **Enhanced patient care** through informed clinical decision-making and personalized treatment plans
- **Preventative care and population health management** by identifying at-risk populations
- **Reduced physician burnout** by 30% through automation and decision support tools

TECHMEDO addresses the problem of limited access to quality healthcare services, with over half of the global population lacking access despite trillions of dollars invested in healthcare. The company targets a vast addressable market, focusing on expanding its reach in Europe, the Middle East, and other regions.
