

# Renew360 — AI-Powered Precision Wellness Platform

Renew360 is a transformative platform that aims to redefine the future of healthcare by empowering individuals to take control of their health. By leveraging cutting-edge AI, wearable technology, and a patient-centric approach, Renew360 is positioned to eradicate preventable chronic diseases and make personalized, proactive wellness accessible to all.

# The Future of Medicine

Renew360 is a transformative platform that aims to redefine the future of healthcare by empowering individuals to take control of their health. By leveraging cutting-edge AI, wearable technology, and a patient-centric approach, Renew360 is positioned to eradicate preventable chronic diseases and make personalized, proactive wellness accessible to all.

# The Medical Crisis

**Chronic diseases like Type 2 Diabetes, Hypertension, and Obesity remain the leading causes of death and disability.**

These preventable conditions continue to pose a significant threat to public health, highlighting the need for a paradigm shift in healthcare.

**Most health systems treat illness reactively, not proactively.**

The current healthcare model is focused on treating symptoms rather than addressing the root causes of health issues, leaving many individuals vulnerable to chronic diseases.

**Preventive, personalized care is fragmented, hard to access, and locked behind institutional barriers.**

Individualized preventive care is often difficult to obtain, as it is scattered across various providers and hindered by complex systems, limiting access for many people.

**The current healthcare landscape is plagued by a reactive approach, limited access to personalized preventive care, and the widespread prevalence of chronic diseases. This reality sets the stage for Renew360's mission to transform the healthcare system and empower individuals to take control of their well-being.**

In The News

"Discover how Olympus is leading the charge towards a more connected and efficient healthcare system with their interoperability solution for endoscopy departments. By streamlining processes and providing real-time data, this technology has the potential to save time, improve patient care, and ultimately save lives."...show less

## Our Mission

To eradicate disease by transforming human health into a proactive, AI-optimized experience — guided by expert-designed protocols and patient-empowered systems. Starting with chronic diseases, Renew360 aims to create the world's first intelligent, accessible, and preventative health operating system.

# Introducing Renew360

**Tracks biometric and behavioral data**

Via wearables and mobile devices

**Uses AI to detect early disease signals**

Recommends personalized interventions

**Connects users with health peers and professionals**

To sustain behavioral change

**Allows patients to control, own, and share their medical data**

On their own terms

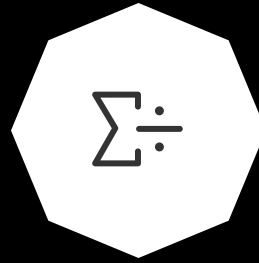

**Renew360 is a comprehensive, AI-powered platform that empowers individuals to take charge of their health and wellness through personalized insights, community support, and seamless data management.**

# Medical-Grade Architecture

## **Designed in collaboration with:**

Board-certified anesthesiologists, Pain management physicians, Sports medicine specialists, Regenerative medicine innovators, et al.

## **AI algorithms based on:**

Evidence-based clinical pathways, synthetic data, and simulated clinical workflows

## **Wellness protocols are structured to target:**

Early-stage chronic inflammation, vascular compromise, glucose regulation, and obesity markers

By bringing together a team of medical experts and basing its AI algorithms on clinical evidence, Renew360 has developed a robust, medical-grade architecture to deliver personalized, preventative wellness solutions.

# A New Standard in Health Access

## Global Accessibility

Anyone with a smartphone and wearable can access precision health insights

## No Gatekeeping

AI delivers high-quality, clinically backed insights without requiring in-person visits

## Augmented Experience

Enhanced with integrations for heart rate, sleep, movement, blood pressure, glucose, and more

Renew360 is revolutionizing healthcare access by empowering individuals globally with personalized, AI-driven wellness insights and data-driven tools, all from the convenience of their own devices.

# Intelligent Health + Human Connection

**AI analyzes your health data  
continuously**

to generate custom plans tailored to your  
unique health profile and needs

**The app matches you with  
accountability partners, wellness  
circles, and expert communities**

based on shared goals, biometric data,  
and areas for health improvement

**Track progress socially and stay  
supported**

by a like-minded network of health-  
conscious users who can provide  
motivation and guidance

**By harnessing the power of AI and fostering a supportive,  
connected community, Renew360 empowers users to take an  
active role in their health and wellness, driving sustainable  
behavioral change.**

# Data Sovereignty & Medical Defragmentation

**Your health data is your property**

Not the hospital's, not the insurer's

**View all personal health records in one place**

Renew360 gives patients the tools to manage their data

**Control who sees what, when, and how**

Patients have full control over their data

**Share health updates securely with any provider or connection, instantly**

Enabling seamless data sharing and collaboration

**Pioneering a patient-centric health network model**

Renew360 is transforming the traditional healthcare system

# Market Opportunity

**Global Digital Health  
Market**

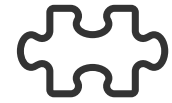

\$660B+ by 2027

**1B+ people suffer from  
preventable chronic  
conditions**

**4.5B smartphone users,  
most without structured  
access to preventative  
care**

**Renew360 is uniquely  
positioned to scale AI-  
based, medically-backed  
prevention to the masses**

**With a massive underserved market, a growing digital health industry, and a unique AI-powered platform, Renew360 is poised to lead the charge in transforming healthcare from reactive to proactive, personalized, and accessible for all.**

# Business Model

## Freemium

Core health tracking and community access

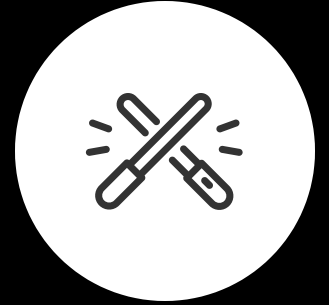

## Subscription

Personalized insights, AI-guided health plans, clinician dashboards

## Enterprise Partnerships

Universities, corporate wellness programs, and digital clinics

## Future

Premium modules for condition-specific health optimization (e.g., cardiac, metabolic)

Renew360's comprehensive business model leverages a freemium and subscription-based approach, strategic enterprise partnerships, and plans for premium condition-specific offerings - all aimed at making personalized, AI-powered wellness accessible to individuals and organizations alike.

# Early Traction & Development

- **Figma prototype and AI logic modules developed**

The Renew360 team has built a functional Figma prototype and developed the underlying AI logic modules to power the platform's personalized insights and recommendations.

- **Wearable API integration in progress**

Renew360 is actively working on integrating with leading wearable device APIs to seamlessly capture and incorporate real-time biometric data into the platform.

- **Beta network forming with physicians and wellness institutions**

Renew360 is building a strong network of medical professionals and wellness-focused organizations to participate in the platform's beta testing and provide valuable feedback.

- **Over 500+ early access users on waitlist**

There is significant early interest in Renew360, with over 500 individuals already on the waitlist to access the platform's advanced features and services.

- **Core architecture built on privacy-first, medical-grade standards**

Renew360's underlying architecture has been designed with a strong focus on data privacy and security, adhering to the highest medical-grade standards to ensure the safe and responsible handling of user health information.

# Reginald Newsome, MD

- **Founder, AI Systems Lead Physician, Technologist, and AI Systems Architect** focused on eradicating preventable disease through proactive, intelligent health.
- **Medical Contributors:** Interventional Pain and Spine, Sports Medicine, Regenerative Medicine Experts, et al.
- **Advisors:** Experts in Health Tech, Clinical AI, and UX Design, AI Solutions

# The Ask

- **Raising \$500K Seed Round**  
Seeking funding to accelerate the implementation and development of the Renew360 platform.
- **Clinical-grade AI system development**  
Investing 35% of funds into building advanced, medically-validated AI algorithms for health insights.
- **Wearable data engineering & privacy framework**  
Dedicating 30% of funds to securely integrate wearable devices and ensure patient data privacy.
- **Pilot programs with medical partners**  
Allocating 20% of funds to launch pilot studies with healthcare providers and wellness institutions.
- **Marketing to early adopters & health networks**  
Investing 15% of funds to reach health-conscious consumers and build a community of Renew360 advocates.

In The News

Radiologists are facing a growing workload and shortage, leading to burnout and compromised patient care. However, implementing AI, specifically large language models, can alleviate this burden by automating administrative tasks and providing insights to aid in diagnostic decision-making. Penn Medicine's AIInSights initiative is successfully integrating AI into radiology workflows, improving efficiency and patient outcomes. By strategically adopting AI, hospitals can not only enhance radiology, but also reduce burnout and improve diagnostic accuracy....show less

## Vision Beyond the App

Renew360 is not just an app. It is a movement to reclaim control over personal health, eliminate preventable diseases globally, make elite, data-driven care universally available, replace fragmentation with intelligent connection, and shift healthcare from "sick-care" to proactive wellness. Renew360 aims to revolutionize the way we approach healthcare, empowering individuals to take charge of their wellbeing through a comprehensive, AI-powered platform.
