Cross|Border
IMPACT VENTURES

INVESTMENT THESIS

The Women's and Children's Health Tech Fund II invests in deep technology companies commercializing disruptive technologies such as medical devices, diagnostic tools, digital therapeutics, and digital health solutions incorporating sophisticated technologies such as AI and ML. The Fund's mission is to contribute to addressing the unmet health needs of women and children, including healthcare needs exacerbated by climate change. Investee companies are primarily located in North America and Europe, and make legally binding commitments to bring their technologies into emerging markets to achieve measurable impact. Target investments include software companies with \$1M - \$10M in annual revenue, as well as companies developing breakthrough regulated technologies at or near CE Mark or FDA approval.

FOCUS AREAS

HEALTH FOCUS AREAS

- Women's Health
- Children's Health

TECHNOLOGY FOCUS AREAS

- Medical devices
- Diagnostic tools

- Digital health solutions

GLOBAL IMPACT FUND

Our award-winning impact strategy is driven by our fundamental belief that good health should not be restricted by gender, age, race, wealth, or borders. We work closely with our portfolio companies to scale their world class technologies inclusively and globally. The Fund invests with a health impact, gender, and climate lens, and benefits from a rigorous impact and ESG framework compliant with the EU's SFDR Article 9 regulations.
