

**PRODUCT: AXIOS™ Stent and Electrocautery
Enhanced Delivery System**

COMPANY: Boston Scientific Corporation

THERAPEUTIC AREA & INDICATION:

Trans-gastro or trans-duodenal repair of pancreatic
pseudocysts and necrosis

ABOUT THE PRODUCT

The AXIOS Stent and Delivery System is an endoscopic device designed to enable the therapeutic endosonographer to deliver a transluminal stent between the gastrointestinal tract and a fluid collection (i.e. a pancreatic pseudocyst or a walled-off necrosis). The AXIOS Stent is a flexible, MRI Conditional, fully covered self-expanding metal stent that is preloaded within the Delivery System. Once placed, the AXIOS Stent functions as an access port allowing passage of standard and therapeutic endoscopes to facilitate debridement, irrigation and cystoscopy.
