

PRODUCT: **Cala Trio™**

COMPANY: Cala Health

THERAPEUTIC AREA & INDICATION:
Neuroscience

ABOUT THE PRODUCT

Cala Health's lead product, Cala Trio, is the first non-invasive targeted therapy that reduces hand tremors for adults living with Essential Tremor. A prescription therapy, it is a wrist-worn device calibrated to treat a patient's unique tremor symptoms. When activated, Cala Trio gently stimulates the nerves in the wrist to disrupt the tremulous activity in the brain, without the need for invasive brain surgery or medication. The easy-to-use and effective Cala Trio can be prescribed through an in-person consultation or telemedicine appointment. Therapy is conveniently delivered to the patient's home, and Cala educates patients based on how they learn.
