

PRODUCT: **OWise**

COMPANY: Px HealthCare

ABOUT THE PRODUCT

Px is the digital health company that puts patient experience at the heart of delivering better oncology outcomes.

With its OWise platform, Px has developed evidence-based, accredited mobile apps and web apps for people living with breast or prostate cancer. These apps support patients from the first day of diagnosis, throughout their cancer treatment and during their follow-up period. OWise has been designed to create a systemic change to value-based cancer care, by

- Supporting patients with personalized digital technology.
- Enabling patients to share health data in real-time, via main Electronic Medical Record systems, with their care teams.
- Bridging the evidence gap, by supporting health organizations with patient-centric Real-World Insights.
